How to Use the Appliance

Setting the speed

When activating the variable speed button (2), the processing speed corresponds to the setting of the variable speed regulator (1). The higher the setting, the faster the chopping results. You can adjust the speed conveniently during operation by turning the speed regulator.

Maximum processing speed can be achieved by pressing the Turbo button (3). You may also use the Turbo button for instant powerful pulses without having to manipulate the speed regulator.

Blending Shaft (A)

The hand blender is perfectly suited for preparing dips, sauces, salad dressings, soups, baby food, as well as drinks, smoothies and milkshakes.

For best results, use the Turbo speed.

For detailed processing instructions refer to section A.

Whisk Accessory (A)

Only the «bc» chopper accessory (13) with the special ice blade (13c) is allowed to crush ice cubes.
